## **Party: Albania**

### **Electronic Reporting System of the Basel Convention (Year: 2016)**

#### **Note to the Focal Point about key updates to the electronic reporting system**

##### **1) Revised questionnaire for national reporting**

The online questionnaire for reporting for the year 2016 incorporates the revisions to the format for national reporting contained in document UNEP/CHW.12/INF/16/Rev.1 and annexes I and III of document UNEP/CHW.13/9/Add.2/Rev.1. As a result, you will encounter a number of differences between the questionnaire to be used for reporting for the year 2016 and the one for reporting for previous years.

##### **2) Pre-filling of the questionnaire for the year 2016**

To assist you in submitting the national report, the online reporting questionnaire has been pre-filled with the most recent information submitted to the Secretariat when this was considered appropriate. Pre-filling has been done for question 1, questions 3 to 7 and tables 1 to 3. Due to significant revisions to the questionnaire for reporting for 2016, some questions (such as question 2) could not be pre-filled and some of the pre-filled information may no longer be valid.

It is essential that you carefully verify that the information used for pre-filling is still valid and update it as necessary.

##### **3) Importing data on the export (table 4) and import (table 5) of hazardous wastes and other wastes**

The online reporting questionnaire provides you with several options for filling in tables 4 and 5.

One option is for you to import the data into the tables by uploading an Excel file. For the data to be accepted by the ERS, please make sure to use the Excel file template and to follow the validation rules (both are available for download in the sections corresponding to tables 4 and 5 of the online reporting questionnaire).

##### **4) Submitting the report**

When you are ready to submit the report, please proceed to the last page of the questionnaire and click on the "Submit" button that appears in the menu bar at the top of that page. Note that the system will issue alerts about any incomplete or invalid answer. The alerts are intended to assist you

**in reviewing the report and do not prevent its submission.**

☒ National strategies/policies

**Provide details:**

- The National Environmental Action Plan was approved since 2001;
- Solid Waste Management Plan;
- The approval in July 2001 of the "Strategic Action Plan for healthcare waste management in Tirana city". This document is prepared from ECAT-Tirana (Environmental Center for Administration and Technology), and it is approved from Minister of Health.
- National Action Plan on abolition from use and elimination of Persistent Organic Pollutants (POPs), December 2006
- A few municipalities have prepared the Local Plans on Waste Management.

Albania is working to prepare the National Strategy on Waste Management, and local plans, as well as New National Waste Management Plan.

During the year 2005 was prepared the draft-National Strategy on Hazardous Waste Management They may be approved soon.

☒ Yes

☐ No

**If yes, please specify or give details where information could be found or obtained:**

During these years are done several surveys, studies , monitoring programs on state of environment and feasibility studies for remediation of areas with significant environmental degradation:

1-In Autumn 2000, UNEP performed an assessment of Albania's environment. The results were detailed in the report "Post-Conflict Environmental Assessment - Albania". During this assessment, UNEP investigated nine potential 'hot spot' sites that had been identified during a pre-mission conducted in cooperation with national / Albanian authorities. The assessment determined that five of the nine sites were, in fact, 'hot-spots' posing imminent risks to public health and the environment. The assessment report also presents findings regarding the impacts of the Kosovo conflict on Albania's environment and Albania's institutional capacity for environmental protection. The report concluded with a series of recommendations for improving the state of Albania's environment.

2-In order to catalyze urgently needed environmental action, UNEP performed a follow-up risk reduction assessment in Spring 2001. This feasibility study, focused on the hot spots identified in Durrës and Vlorë as well as the more general challenge of creating hazardous waste management infrastructure in Albania.

3-In September 2001, building on previous work by UNEP as well as national and international partners, the Government of Albania, supported by the Swedish International Development Cooperation Agency (SIDA), requested UNEP to conduct a feasibility study at Sharra Landfill, at one of the identified "hotspots" of Albania, that would identify and catalyze urgently required environmental measures.

4- The Environmental Performance Reviews in Albania carried out in 2002. There is a chapter on waste management.

5-The project of Institute of Environment carried out in 2002 "Monitoring of quality of air, surface and underground water in Sharra dumpsite",

6-The project of Institute of Environment done in 2002 "Monitoring of air, surface water, underground water, and soil in metallurgical cooper plant in Rubik"

7- The project of Institute of Environment in 2004 "On environmental assessment on industrial dumpsites in Metallurgical Complex in Elbasan, Superphosphate plant in Lac, Metallurgical Cooper plant in Rubik, Iron- nickel enrichment plant in Pogradec".

8-The project of NGO "Health 2000 " The assessment of human health in Chemical Plant in Durres" (one of the hot-spots). This project was financed from state budget in 2004.

9-The project of Institute of Environment "The assessment of environmental pollution in area of Bisht-Palla storage". About 370 ton of expired chemicals and pesticides are stored in open storehouses 1,5 km from former chemical plant in

Durres.

10. The project on "Feasibility study on remediation of former chlor -alkali and polyvinyl chloride plant (PVC) in Vlora", financed from World Bank. The project started in 2003 and continued during 2004.

11. Project on "Feasibility study on remediation of former chemical plant in Durres" started in 2003 and continued during 2004. In 2005 has started the project for remediation of this contaminated area by pesticides and chromium.

12. Project on "Repackaging and removal from Albania of pesticides and other chemicals in Bishti I Palles" financed by Dutch government . The removal was finalized in July 2006.

The quantity of hazardous accumulated at industrial facilities totaled 3105 tons, of which 2115 tons are stored as obsolete chemicals and 990 tons could be used as raw materials. No measures are being taken to destroy these obsolete hazardous chemicals. In addition, about 1000 tons of obsolete pesticides have accumulated in agriculture (farms and storage).
